GENERAL NOTES

The statistics presented in this publication are compiled from information submitted to the Department of Hospitals and Medical Care by each general hospital, auxiliary hospital and nursing home.

Hospital operation and financial data, shown in Tables 1 to 43, are derived from the **Annual Return of Health Care Facilities - Hospitals - Part One and Two** for the year ended March 31, 1985. The data include all amendments and corrections submitted to the Department by individual hospitals on or before March 4, 1986. The financial data presented in Tables 34 to 43 are compiled and reported on an accrual basis. Tables 34, 35, 38, 39 and 42 contain unaudited expenditure data, while Tables 36, 37, 40, 41 and 43 contain audited operating expense data as certified and reported by the external auditor of the hospital. When interpreting the above data, reference should be made to the Glossary which contains selected definitions of terms used in the Annual Return.

Nursing home operation and patient data, shown in Tables 44 to 52, are derived mainly from nursing home claims payment statistics for the fiscal year 1984-85 and include all amendments and corrections submitted to the Department by individual nursing homes on or before March 4, 1986. The exceptions to this are columns 1 and 2 of Table 44 which are obtained from the nursing home contracts and the **Alberta Nursing Home Plan, Monthly Information Report** for the year ended March 31, 1985, respectively.

The statistical tables which follow provide detailed information on the operation and utilization of hospitals and nursing homes. In these tables, the facilities have been arranged in ascending order of approved bed complement within each facility group. An alphabetical listing for each type of facility can be found at the end of the supplement.

Note: All rates shown in the following tables have been rounded to one decimal place.
